PROFILE

I'm a Full Stack Web Developer with a civil engineering background, specializing in Python, Django, React, and Java Spring Boot. I've built web applications, including tourist and e-commerce platforms. My strong problem-solving skills and passion for web development drive me to seek challenging opportunities in the tech industry.

PROJECTS

Tunist

Full Stack Developer | Team | 4 Weeks

I developed a web Application that aims to link upcoming tourists in Tunisia with local guides, offering a unique and safe experience with the possibility of learning more about their destination through Blogs and renting a suitable accommodation.

- Implementation of Java and Spring Boot for developing the backend.
- Working on the backend and debugging server related errors through research and outsourcing.
- Implementation of a responsive map interface in the web application using Leaflet.
- Developing both the front-end and back-end the admin dashboard using React and Java.

Technologies: Java, Spring Boot, React, Leaflet, MySQL, VS Code, Balsamiq.

Rewear

FullStack Developer & Scrum Master | Team | 2 Weeks

I developed an e-commerce platform where the users of the web app can buy or sell articles of clothing fostering recycling for second-hand garments.

- Working on the back-end controller and routes using Express JS.
- Implementing & debugging the "upload images" feature in the application using Multer.
- Implementing & debugging the "instant messaging" feature in the application using Socket.io.
- Working on parsing data to React's components.

Technologies: React, Coolers, Mongoose, Express JS, Mongo DB, Multer, Socket.io, Node JS, VS Code, Balsamiq.

Fodhni

FullStack Developer & Scrum Master | Team | 2 Weeks

I developed a platform that connects service providers to clients and delivers quality services to the persons who need them.

- Applying Django for both the front-end and the back of the web application through working on the backend controller.
- Creating the database using Postgres.
- Working on view templates using Django.

Technologies: Django, Postgres, Jinja, Python, VS Code, Balsamiq, Coolers
